NC Garments Enterprise System

Official User Manual

Version: 1.0

---

1. Introduction

Welcome to the NC Garments Enterprise System. This platform is designed to streamline your daily operations, from tracking custom garment orders and managing inventory, to processing retail sales and monitoring business analytics.

This manual provides step-by-step instructions on how to navigate and utilize the system's core features.

---

2. Getting Started

2.1 Logging In

Access to the system is restricted to authorized personnel.

1. Navigate to the system login page.
2. Enter your registered **Email Address**.
3. Enter your **Password**. *(Note: If this is your first time logging in, use the temporary password emailed to you by the Superadmin).*
4. Click **Secure Login**.

2.2 First-Time Login & Password Reset

If you forget your password, or if you are logging in for the first time:

1. Click **Forgot Password?** on the login screen.
2. Enter your email address to receive a secure reset link.
3. Click the link in your email (valid for 1 hour) to set a new, private password.

2.3 The Dashboard

The Dashboard is your command center, providing a real-time snapshot of the business.

- **Live Snapshot:** Instantly view Total Sales for the last 30 days, current Active Orders, outstanding Receivables, and Low Stock Alerts.
- **Revenue Overview:** A 6-month comparative chart showing Gross Sales versus Material Costs.
- **Upcoming Deadlines:** A quick view of projects due soon. Click **View Timeline** to open an interactive calendar showing all production deadlines.

2.4 Account Settings

Keep your personal information up to date.

1. Click your **Profile Icon** (your initials) in the top right corner.
2. Select **Settings**.
3. Here, you can update your Full Name and Email Address, or securely change your password.
4. Click **Save All Changes** to apply.

---

3. Core Operations

3.1 Point of Sale (POS)

Use the POS module to process walk-in retail storefront sales.

1. Navigate to **Point of Sale** in the Main Menu.
2. Search or scan the items the customer is purchasing to add them to the cart.
3. Review the total, input the payment method (Cash, GCash, etc.), and complete the transaction. The system will automatically deduct these items from your inventory.

3.2 Orders & Projects

Manage custom garment requests from creation to release.

1. Navigate to **Orders & Projects**.
2. **Create a Project:** Enter client details, project name, total quantity, and the agreed due date.
3. **Track Progress:** Update the project status as it moves through production stages (e.g., *Sampling ➔ Cutting ➔ Printing ➔ Sewing ➔ Quality Check ➔ Finishing ➔ Packing ➔ Released*).
4. **Project Breakdown:** Assign specific raw materials to the project to accurately track your material costs against the agreed price.

3.3 Inventory Management

Keep track of everything in your warehouse to prevent stockouts.

1. Navigate to **Inventory**.
2. Toggle between **Raw Materials** (fabric, thread, buttons) and **Premade Products** (ready-to-sell retail garments).
3. Update current stock levels as deliveries arrive.
4. **Low Stock Alerts:** Set a "minimum threshold" for items. If stock falls below this number, the system will automatically alert you on the Dashboard and via the notification bell.

3.4 Customers & Payments

Manage your clientele and track who owes you money.

1. Navigate to **Customers & Payments**.
2. View individual client profiles to see their active projects and historical orders.
3. **Log Payments:** When a client makes a deposit or final payment on a custom project, log the amount here to accurately update the business's total Receivables.

---

4. Analytics & Administration

Note: Some of these features are restricted to Admin and Superadmin accounts.

4.1 Financial Reports

1. Navigate to **Financial Reports** under the Analytics menu.
2. View detailed ledgers of all retail sales and custom project payments.
3. Click **Download Report** to export your financial data for external accounting.

4.2 Staff Access Management

Superadmins and Admins can control who has access to the system.

1. Navigate to **Staff Access**.
2. **Provision New Account:** Click the button, enter the staff member's name, email, and assign a role (Staff, Admin, or Superadmin). The system will automatically email them a secure, temporary password.
3. **Edit Roles:** Upgrade or downgrade permissions as needed.
    - *Warning: If a Superadmin transfers their role to another user, they will automatically be demoted to an Admin.*
4. **Revoke/Restore Access:** Temporarily disable a user's ability to log in without deleting their history.
5. **Archive:** Permanently remove an account from the active roster.

4.3 System Activity Logs

For maximum security, the system records all critical actions.

1. Navigate to **System Activity**.
2. Review the audit trail to see which user logged in, modified an order, changed a setting, or updated inventory, complete with timestamps and IP addresses.

4.4 Database Backup

1. Navigate to **Backup**.
2. Click to download a secure snapshot of your entire database. It is recommended to perform backups regularly to prevent data loss.
